

Using a flash drive (sometimes called a memory stick, USB stick or thumb drive) to install Quick Qualifier for RE agents and builders.

Step 1. Copy the installation file to the drive. The name of the file will be QQDawson.exe (your last name when received as a download) or setup.exe if copied from the CD that we send.

Click Start, My Computer or Computer. Then drag the install file from where you saved it in your computer to your flash drive.

In your computer, after setting up your closing costs etc. click Import/export in the setup screen.

Next, check Closing Costs and Lender contact information and click Export

In the dialog box that opens, find the flash drive and select it for the location to save the files to. Then click OK

Step 3. When you get to the agents office, use the flash drive to install the program. Just plug in the drive and double click on QQDawson.exe.

Step 4. Reverse the process to Import. You will find a folder on the flash drive called QQSetupFiles. Point to that and click OK.

Practice a couple times in your office and when you get to the agent's office, it will be easy. You can also use the flash drive to copy pictures and logos back and forth.
